Singapore Manufactured Products Price Index (2023 = 100) October 2024

Month-on-Month Change

The Singapore Manufactured Products Price Index rose 1.5% in October 2024, against the 1.2% decrease in September 2024. The Oil index gained 5.2%, in contrast to the 6.1% decrease in the previous month. The Non-oil index increased 0.9% in October 2024, after the 0.3% decline in September 2024.

The increase in the Non-oil index was mainly led by the Machinery & Transport Equipment index, due to higher prices of electrical machinery apparatus, followed by the Miscellaneous Manufactured Articles, Chemicals & Chemical Products, Food & Live Animals, Crude Materials, Manufactured Goods and Animal & Vegetable Oils indices.

Year-on-Year Change

The Singapore Manufactured Products Price Index fell 6.3% in October 2024 from a year ago, extending the 9.0% decrease in September 2024. The Oil and Non-oil indices fell 19.7% and 3.4% respectively.

The decrease in the Non-oil index was primarily driven by the Chemicals & Chemical Products index, attributed to lower prices of organic chemicals, followed by the Miscellaneous Manufactured Articles, Machinery & Transport Equipment, Manufactured Goods, Beverages & Tobacco, and Animal & Vegetable Oils indices. The decreases were partially moderated by increases in the Food & Live Animals and Crude Materials indices.

Domestic Supply Price Index (2023 = 100) October 2024

Month-on-Month Change

The Domestic Supply Price Index rose 0.9% in October 2024, reversing the 1.9% decrease in September 2024. The Oil index gained 1.3%, in contrast to the 6.4% decline in the previous month. The Non-oil index rose 0.8% in October 2024, after the 0.2% decrease in September 2024.

The increase in the Non-oil index was mainly led by the Machinery & Transport Equipment index, attributed to higher prices of electrical machinery apparatus, followed by Miscellaneous Manufactured Articles, Chemicals & Chemical Products, Animal & Vegetable Oils, Food & Live Animals, and Crude Materials indices. The increases were partially offset by decline in the Beverages & Tobacco index.

Year-on-Year Change

The Domestic Supply Price Index fell 5.3% in October 2024 from a year ago, extending the 7.1% decline in September 2024. The Oil and Non-oil indices decreased 14.8% and 2.0% respectively.

The decrease in the Non-oil index was mainly driven by the Chemicals & Chemical Products index, due to lower prices of organic chemicals, followed by the Miscellaneous Manufactured Articles, Manufactured Goods, Machinery & Transport Equipment, Animal & Vegetable Oils, and Beverages & Tobacco indices. The decreases were partially moderated by increases in the Food & Live Animals and Crude Materials indices.

Technical Note

The **Singapore Manufactured Products Price Index (SMPPPI)** monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2023. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The **Domestic Supply Price Index (DSPI)** is designed to measure the changes in the price level of either goods manufactured locally or imported, which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2023.

Index Formula

The 2023-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2022 preceded the price reference period of 2023. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2018-Based Price Index Series to the New 2023-Based Price Index Series

The SMPPPI and DSPI have been rebased from base year 2018 to base year 2023. To facilitate comparison of the historical price indices across base years, the old 2018-based series are linked to the new 2023-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2018-based index in 2023.

Example: Linking the old Iron & Steel Index series for SMPPPI prior to 2023, to the 2023-based Iron & Steel Index (2023=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)	Linked Coefficient
2023	135.6	100.0	$100.0 \div 135.6 = 0.737$

2) Re-scaling the old series to the 2023-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)
2021	Dec	125.6	$125.6 \times 0.737 = 92.6$
2022	Jan	127.2	$127.2 \times 0.737 = 93.7$

Rescaling the 2023-Based Index Series to Previous Years

To continue the old 2018-based index series going forward in time, re-scale the new 2023-based index series to the old base year 2018 level, via a Rescaling Coefficient. The Rescaling Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2023-based index in 2018.

Example: Rescaling the new 2023-based Iron & Steel Index series for SMPPI to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the rescaling coefficient

Year	Annual Iron & Steel Index in 2023	Annual Iron & Steel Index in 2018	Rescaling Coefficient
2023	100.0	73.7	$100.0 \div 73.7 = 1.357$

2) Re-scaling the new series to the 2018-based series using the Rescaling Coefficient

Year	Month	Iron & Steel Index (2023=100)	Iron & Steel Index (2018=100)
2024	Jan	100.0	$100.0 \times 1.357 = 135.7$
2024	Feb	100.6	$100.6 \times 1.357 = 136.5$

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Singapore Manufactured Products and Domestic Supply Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at <https://www.singstat.gov.sg/publications/economy/producer-price-indices> or through the QR code below:

NOTES

The Singapore Manufactured Products and Domestic Supply Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.

SINGAPORE DEPARTMENT OF STATISTICS COMMUNICATIONS & INFORMATION SERVICES

Singapore Department of Statistics (DOS) offers official statistics, data insights, visualisations and statistical resources through user-friendly platforms.

SingStat Website

Visit this convenient gateway to access latest data and statistical information.

Data across the six major themes of Economy, Industry, Trade & Investment, Population, Households and Society, covering some 200 topics such as Gross Domestic Product, Consumer Price Index, Retail Sales and Food & Beverage Services Indices, Producer Price Indices, Business Expectations, Business Receipts Index, Trade in Services, Direct Investment, Population Indicators, Household Income, Household Expenditure, Deaths and Life Expectancy, Births and Fertility, Marriages and Divorces, and more.

Publications

- Information Papers which highlight conceptual and methodological changes and improvements in official statistics.
- Occasional Papers which present statistical trends and observations on important social and economic issues to stimulate discussion and research.
- eBook of Statistics which consolidates latest information and resources on key economic and socio-demographic domains.
- Singapore in Figures which allows exploration of key economic and socio-demographic statistics through interactive dashboards.
- Statistics Singapore Newsletter which features articles on latest key statistical activities, recent survey findings and methodological improvements.

Visualisations such as infographics and interactive dashboards with latest data, and videos to explain data and statistical concepts.

Data for Businesses with data tools to empower data-driven business decisions, giving firms insights on their customers, industries and business performance.

Advance Release Calendar providing dates of upcoming data releases in the next six months.

SingStat Table Builder

Access for free over 2,200 data tables across various economic and socio-demographic domains from 70 public sector agencies. Watch the [video](#) to find out how you can easily access and customise data tables.

SingStat Mobile App

Download the app for fast and convenient access to commonly used statistics from your mobile devices. Over 300 charts are available across 41 data categories for easy access to visualise data trends.

SingStat Express

Subscribe to receive alerts on the latest press releases, occasional/information papers and newsletters.

For statistical enquiries, you may reach us at:

email: info@singstat.gov.sg or submit the [Data Request Form](#)

phone: 1800-323 8118* (Local users) or (65) 6332 7738 (Overseas users)

* Calls from mobile telephone lines to 1800 local toll-free number may be subject to mobile airtime charges as imposed by the relevant mobile service provider.
