

Personal Disposable Income and Saving Third Quarter 2024

Personal disposable income refers to the maximum amount that the personal sector can afford to spend on consumption of goods and services, without having to reduce their financial or non-financial assets or to increase their liabilities. Personal saving (i.e., difference between personal disposable income and private consumption expenditure of goods and services) reflects the funds available for the purchase of financial assets, non-financial assets or repayment of debts. Hence, personal saving differs from the common perception of 'saving', which often refers to the amount of deposits in bank accounts.

In nominal terms, personal disposable income grew by 7.4% on a year-on-year basis in the third quarter of 2024, higher than the 4.2% increase in the previous quarter. The strengthening in growth can be attributed to stronger growth of compensation of employees and various support measures payments (i.e., Cost-of-Living Special Payment and enhanced GST Voucher cash payout).

Personal saving expanded by 3.9% on a year-on-year basis in the third quarter of 2024, compared to the 5.2% decrease in the second quarter. The personal saving rate, which is defined as the share of personal saving out of personal disposable income, increased to 32.1% in the third quarter of 2024 from 29.5% in the previous quarter.

Nominal Growth in Personal Disposable Income and Saving, Private Consumption Expenditure and Compensation of Employees, and Personal Saving Rate

	Q1 2024	Q2 2024	Q3 2024
	<i>Year-on-Year Percentage Change</i>		
Personal Disposable Income	6.2	4.2	7.4
Personal Saving	2.9	-5.2	3.9
Private Consumption Expenditure	8.3	8.8	9.2
Compensation of Employees	5.7	4.4	5.0
	<i>Per Cent</i>		
Personal Saving Rate	36.9	29.5	32.1
